To complete this kit, I used setting C of the adjustable punch needle. You can play around with the settings to see what you like best - maybe make the background shorter or longer to make the bee stand out ;)

- (1) Thread your punch needle with the black yarn and fill out the outline of the bee, filling out the head and bottom parts of the body as shown. The parts that only have lines, make the stitches shorter - about every 2 holes - to make sure there are no gaps in the lines on the front. That way you'll also only have to punch lines once,
 - (2) Thread your punch needle with the cream yarn and punch the inside of the wings.
 - (3) Moving on to yellow yarn. Thread your needle and punch body.
 - (4) Thread the punch needle with the background yarn and punch the background.
 - turn the piece over and take a look at the piece as a whole. Snip ends and beginnings of your stitches. Are there any stitches that are much longer than the rest? If so, snip them just like you would when ending a stitch and mix them in with surrounding stitches so they're not as obvious.
 - straighten out the outline by moving stitches around. Detailed video is [here](#).
- step back and enjoy the awesomeness you just created and be proud of yourself!**

I cannot wait to start getting pictures from all of you to see your beautiful work. Don't forget, I'm only a message away should you have questions ;)
